Matters relating to technology development and transfer
Poznan strategic programme on technology transfer

Version 12/11/2026 2:00

Draft decision -/CP.31

Poznan strategic programme on technology transfer

The Conference of the Parties,

Recalling decisions 2/CP.14; 1/CP.27, paragraph 46; 9/CP.29; and 18/CMA.7, paragraph 6,

1. *Welcomes with appreciation* the report on the evaluation of the Poznan strategic programme on technology transfer, prepared by the secretariat under the guidance of the Technology Executive Committee and in consultation with the Global Environment Facility;[1]

2. *Also welcomes with appreciation* the funding provided by the Global Environment Facility for activities under the Poznan strategic programme and for technology needs assessments by developing countries, and the reporting of the Global Environment Facility thereon in its annual reports to the Conference of the Parties;

3. *Notes with concern* the continued delay in the preparation of terminal evaluation reports by implementing entities of the Global Environment Facility for two regional projects and one national project conducted under the Poznan strategic programme;

4. *Acknowledges* that, since the start of the sixth replenishment cycle of the Global Environment Facility in July 2014, technology development and transfer has been embedded in its programming strategy, along with elements of the long-term plan for implementation of the Poznan strategic programme[2], and *encourages* the Global Environment Facility to further strengthen its provision of support for technology development and transfer, including through collaboration with the Climate Technology Network and Centre;

5. *Notes with concern* the current status of the ninth replenishment of the Global Environment Facility, covering July 2026 to June 2030, which affects the ability of developing countries to implement the outcomes of their technology needs assessments;

6. *Requests* the secretariat, in collaboration with the Technology Executive Committee, the Climate Technology Centre and Network, the Global Environment Facility, the Green Climate Fund and the United Nations Environment Programme Copenhagen Climate Centre as the executing agency of the technology needs assessment global project, to make information on the outcomes of technology needs assessments available on the technology information clearing house, TT:CLEAR, and *invites* Parties to submit their technology needs assessment reports to the secretariat;

7. *Requests* the secretariat to prepare an updated synthesis report on technology needs assessments[3] on the basis of the information contained in the technology needs assessment reports submitted to the secretariat, between 1 January 2018 and 31 December 2026, prepared with support provided under phases III–IV of the technology needs assessment global project, and by the Green Climate Fund and the Climate Technology Centre and Network, for consideration by the Subsidiary Body for Implementation at its sixty-seventh session

[1] FCCC/SBI/2026/9, prepared in response to decision 9/CP.29, para. 2.
[2] FCCC/SBI/2010/25, Annex.
[3] The latest synthesis of technology needs identified by Parties not included in Annex I to the Convention is contained in document FCCC/SBI/2020/INF.1.

(November 2027) with a view to recommending a draft decision thereon for consideration and adoption by the Conference of the Parties at its thirty-second session (November 2027);

8. *Acknowledges* the successes, challenges and lessons learned in the implementation of the Poznan strategic programme, contained in the report referred to in paragraph 1 above;

9. *Welcomes* the key messages on strengthening technology implementation in developing countries, contained in the report referred to in paragraph 1 above;

10. *Encourages* actors that facilitate climate technology development and transfer to support the implementation of technology priorities in developing countries by: providing a range of tailored support modalities depending on their expertise and resources, such as financial, technical and capacity-building support; promoting technology piloting and demonstration; and leveraging the engagement and resources of multilateral development banks and implementing agencies of climate funds, and other financial and private sector actors;

11. *Invites* actors supporting the implementation of the Belém Technology Implementation Programme, including the Technology Executive Committee, the Climate Technology Centre and Network, the operating entities of the Financial Mechanism and the Adaptation Fund, to consider taking programmatic and results-based approaches to the design, delivery and monitoring and evaluation of activities undertaken in support of the Belém Technology Implementation Programme, as well as leveraging the engagement of the private sector in this context;

12. *Also invites* the Technology Executive Committee and the Climate Technology Centre and Network to consider the findings in the report referred to in paragraph 1 above in preparing their next workplan and programme of work respectively, as well as the next joint work programme of the Technology Mechanism, particularly when incorporating the elements of the Belém Technology Implementation Programme[4] into their work, and to include information on action taken in this regard in their joint annual report for 2027;

13. *Decides* to conclude consideration of the Poznan strategic programme;

14. *Takes note* of the estimated budgetary implications of the activities to be undertaken by the secretariat referred to in paragraphs 6 and 7 above;

15. *Requests* that the actions of the secretariat called for in this decision be undertaken subject to the availability of financial resources.

---
